

CV

Denis Erofeev · Senior Ruby on Rails developer

Backend developer with 19 years 7 months in the profession. Core stack is Ruby (Rails, Hanami), plus Go. I design APIs, work with databases under load, build asynchronous integrations, and grow legacy codebases instead of fearing them.

SKILLS

Languages

- Ruby
- Go
- JavaScript
- SQL
- Shell

Frameworks

- Ruby on Rails
- Hanami
- RSpec
- React
- jQuery

Data & queues

- PostgreSQL
- MySQL
- MongoDB
- Redis
- Elasticsearch
- Sphinx
- Kafka
- RabbitMQ

Infrastructure

- Linux (Ubuntu, Debian, Red Hat)
- Docker
- Kubernetes
- Git

EXPERIENCE

November 2024 – present
1 year 10 months

Konsol.Pro
Senior backend developer
Russia

- A platform for hiring self-employed contractors: tasks, document flow, instant payouts and tax risk control.
- Fintech integrations: bulk payouts to contractors via instant payments and partner banks
 - Tax service integration: a receipt for every payout, income limit checks
 - Public API for corporate clients and integrations with their systems
 - Platform core and performance: tasks, contractor onboarding, database under load, background jobs

December 2022 –
November 2024
2 years

RTK IT CONCURRENT

Senior backend software engineer

Moscow, Russia

A smart home platform: devices, automation scenarios, mobile apps.

- Designed and built microservices for the complex parts of the product
- Integrated those microservices with the monolith

August 2021 –
November 2024
3 years 4 months

igoods CONCURRENT

Senior backend software engineer

Saint Petersburg, Russia

A grocery delivery service.

- Fintech integrations: payouts through Rocketbank, Tinkoff and other banks

April 2021 –
July 2021
4 months

Soft Project

Senior software engineer

Moscow, Russia

August 2017 –
April 2021
3 years 9 months

OneClass

Fullstack Ruby on Rails developer

Toronto, Canada

A Canadian edtech startup with study materials for students.

- A wide range of Rails work, from business logic to legacy maintenance
- Focused interface work in React

August 2016 –
August 2017
1 year 1 month

ABAK-PRESS

Fullstack Ruby on Rails developer, DevOps engineer

Yekaterinburg, Russia

December 2015 –
August 2016
9 months

ITBeaver

Fullstack Ruby on Rails developer

Perm, Russia

February 2007 –
December 2015
8 years 11 months

Volgogradenergosbyt

Lead programmer

Volgograd, Russia

EDUCATION

1999 – 2004

Volgograd State Technical University

Faculty of Electronics and Computer Engineering

Volgograd, Russia

- BSc: automated information processing and control systems
- Engineer: computers, systems and networks

CONTINUED EDUCATION

April 2024 –
September 2024

Software Architect Skillbox

- Architectural styles, distributed architecture, monolith refactoring
- Functional and non-functional requirements, API design
- Transaction management, event-driven work, integration
- Service discovery, configuration, security, API gateway
- Infrastructure and runtime, observability, cloud native

COMMUNITIES

May 2011 – present

GitHub

4781 contributions across 19 repositories: Ruby, JavaScript, Go, SCSS, Shell

ABOUT

I design and grow the server side of web applications: APIs, business logic, integrations, data access and background processing.

Frontend – React, jQuery, HTML5, CSS – when the interface needs support or extending.

I can take services to production and keep them there: designing APIs, working with databases under load, building asynchronous integrations, and making sense of legacy code. I take part in open source.
